

Where did the time go?

The bottleneck moved from underwriting to appraisal capacity and borrower rework.

Median Cycle Time
45.19 days

Appraisal Wait
14.09 days

Fallout Dollars
\$1,506.24M

Rural Share of Delay
38.49%

Where the Cycle Time Broke

The Delay Was Waiting, Not Underwriting

Rural Markets Carried the Appraisal Burden

Borrower Rework Is the Slowest Link

Fallout Spiked After the Shock

Recommended Actions

1. Expand appraisal panels in rural markets with thin vendor coverage.
2. Front-load borrower documentation to reduce condition rounds.
3. Do not mass-hire underwriters—the queue is not the primary constraint.
